Notice Issued Thursday, March 26, 2026, for Thursday April 2, 2026

PLANNED WATER SERVICE INTERRUPTION AND PRECAUTIONARY DRINKING WATER ADVISORY

Please be advised that water service to homes and businesses in the vicinity of County Road 218, as shown on the attached map, will be interrupted on **Thursday, April 2, 2026, from 6:05pm until approximately midnight** for a modification of the water distribution system in the area. Water service WILL be available EXCEPT during the hours listed above. **The precautionary advisory starts when the water is restored AFTER the work is completed Thursday night and will remain in effect until notice of the clearance has been provided.**

**CUSTOMERS THAT DID NOT RECEIVE A NOTICE ARE NOT AFFECTED BY
BOIL WATER ADVISORY**

The advisory will remain in effect until the Clay County Utility Authority conducts a bacteriological survey of your public drinking water supply. **Two consecutive days of satisfactory bacteriological samples are required before this advisory can be lifted.**

We will post a notice on your door and update our website when the “Drinking Water Advisory” has been lifted.

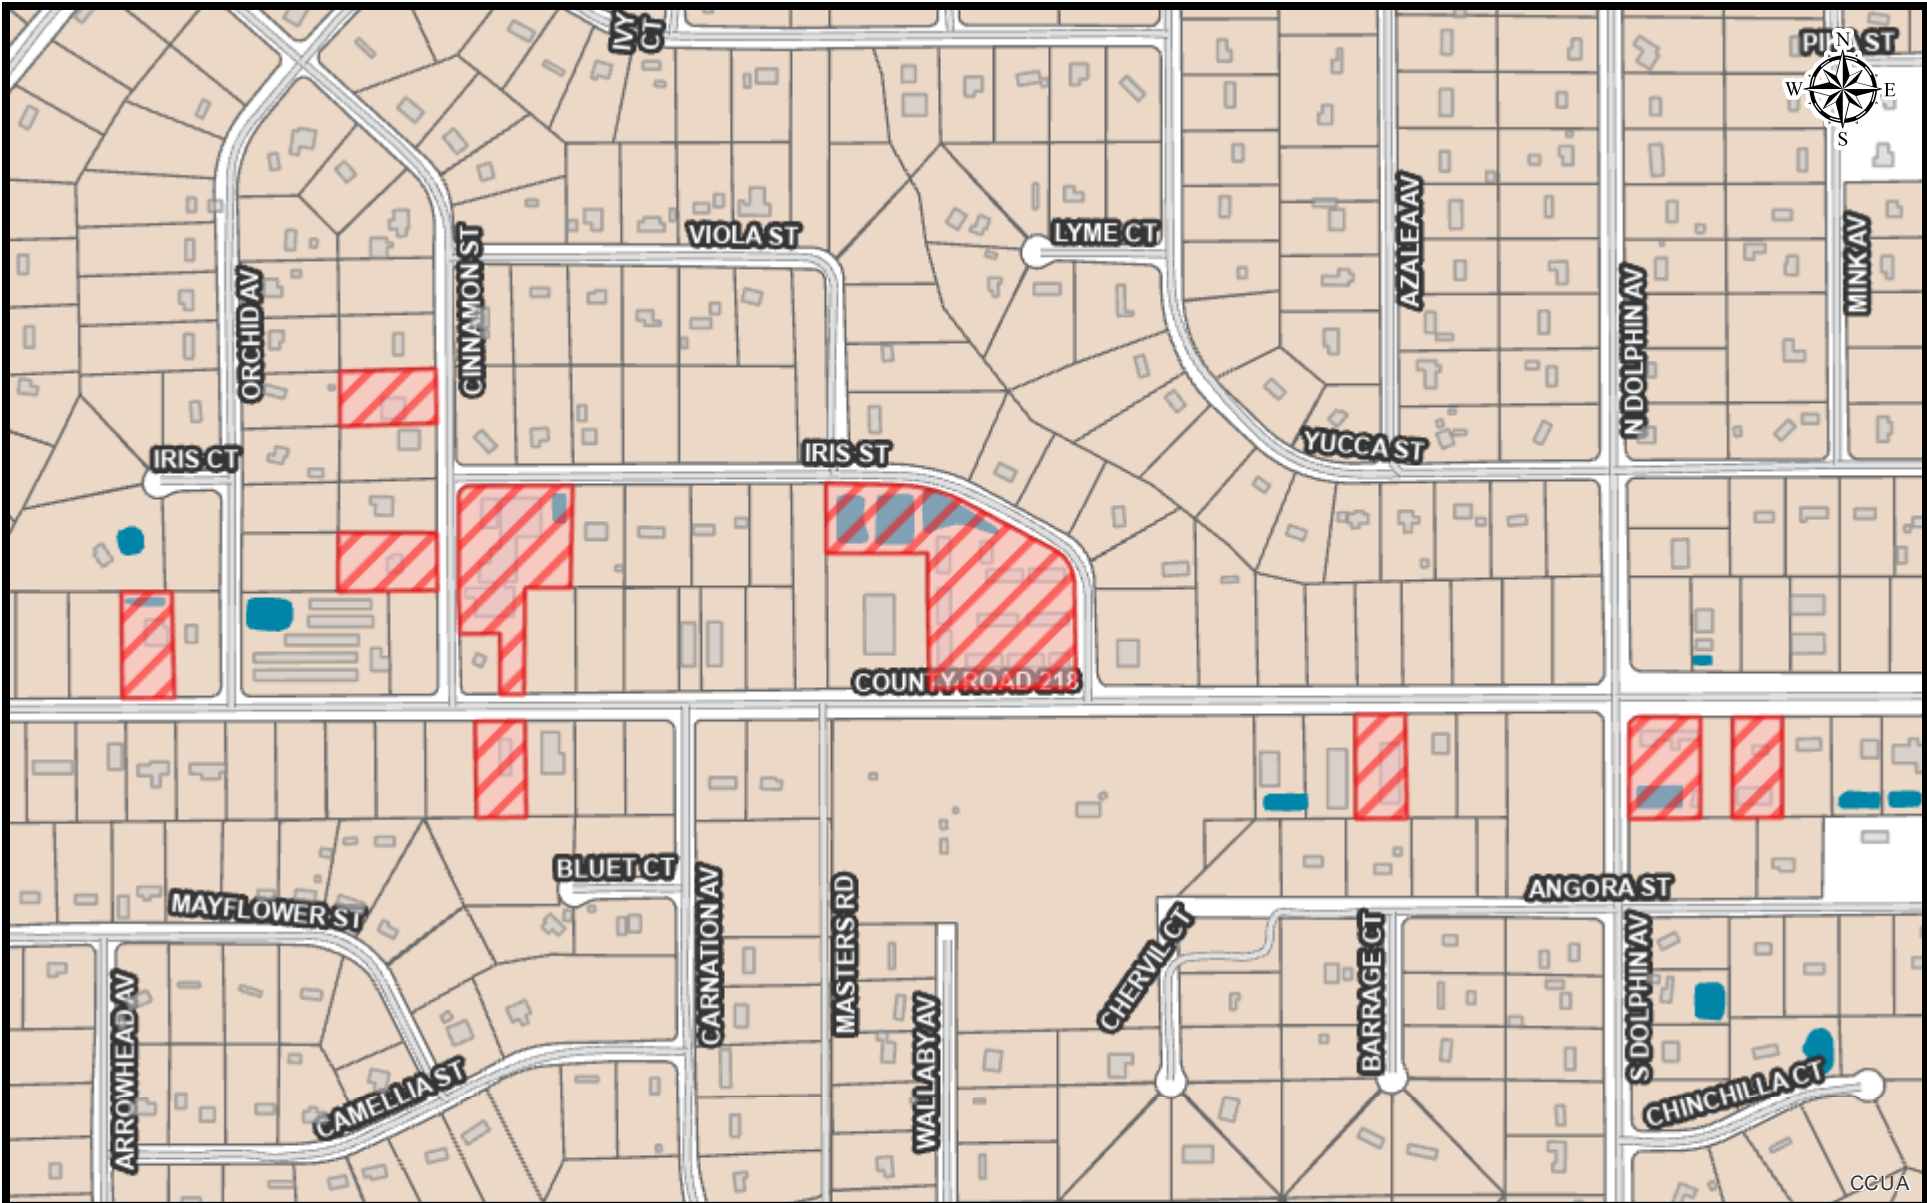

While the water is off, we recommend that you turn off all appliances that automatically draw water - including but not limited to washing machines, dishwashers, ice makers, water heaters, water softeners.

Service will be restored once our technicians complete the repair and have flushed the water lines and measured disinfection levels to ensure water quality. Once this occurs, we suggest you allow water to run in your kitchen and bathrooms for several minutes to remove any sediment or air may have entered the system. **If there is air in your system the water will appear milky, this is no cause for alarm, please flush the line until the air has been removed.**

- IMPORTANT -

As an extra level of care following such an interruption, the Florida Department of Environmental Protection (FDEP) requires Clay County Utility Authority to notify you that you will be under a Drinking Water Advisory. As a precautionary measure and until further notice, you are advised that water used for human consumption (drinking and food preparation) must be **BOILED for at least three (3) minutes.**

We appreciate your understanding and apologize for any inconvenience. Should you have any questions, please call the Clay County Utility Authority's office at (904) 272-5999 or 1-877-476-CCUA. (2282)
